

David Chan

EDUCATION

University of California, Irvine

2023-2025

GPA: 3.85, Dean's Honor List

- Relevant Coursework: Project in Software System Design, Introduction to Software Engineering

Contra Costa College

2021-2023

GPA: 4.0

- Relevant Coursework: Advanced Programming with C and C++, Assembly Language Programming/Computer Organization, Object Oriented Programming in C++, Program Design and Data Structures, Linear Algebra

SKILLS AND INTERESTS

- **Skills:** C/C++, ES6 JavaScript, Java, HTML/CSS, SQL, C#
- **Tools and Frameworks:** NodeJS, ExpressJS, ReactJS, NextJS, Unity Engine, Bootstrap
- **Educational Interests:** Web Development, Artificial Intelligence, Human-Computer Interaction, Game Development and Design, Machine Learning, Graphic Design, Information Systems

PERSONAL PROJECTS

Physics Calculator Website

January 2021 - June 2021

- Developed a static website using HTML/CSS and JavaScript to perform physics calculations based on fundamental concepts/equations (momentum, kinetic/potential energy, gravitational force, etc.)
- Implemented dynamic calculation forms to solve for missing variables
- Provided contextual explanations and embedded resources for an enhanced user experience
- Integrated a contact form with Formspree for feedback and suggestions

Fishy Game (Unity)

June 2023

- Developed a 2D game in Unity using C# to gain familiarity with Unity Engine
- Implemented basic controls, game state management, and audio using Unity's built-in components and systems (Rigidbody2D, Collision, SceneManager, AudioSource)

RELEVANT EXPERIENCE

DicomViewer 3D

March 2023 - June 2023

- Collaborated with a team to develop a browser-based application using NodeJS, ExpressJS, and ReactJS for 3D medical scan visualization for a client
- Implemented backend services to handle DICOM file uploads, utilizing 3D Slicer's Python API for model generation, and leveraging three.js for model rendering
- Integrated zip extraction, UUID generation, and file handling functions

Backend Development Intern | DOAH.ai

Present

- Implementing RESTful API endpoints using NodeJS
- Building a client to interact with internal APIs
- Enhancing and creating internal tools to assist with admin panels
- Expanding unit testing coverage for APIs

ORGANIZATIONS

Alpha Epsilon Pi

November 2023 - Present

- Head of New Member Development (Spring 2024)

WORK EXPERIENCE

Target

July 2021 - August 2023

- Worked cohesively with a team to manage online orders, processing over 400 items daily
- Developed strong communication skills to efficiently complete tasks and handle various requests
- Addressed numerous situations involving safety procedures and customer complaints with diligence and professionalism
